

# SCHOLARONE BOOKS™

ACCELERATE YOUR END-TO-END BOOK PUBLISHING PROCESS

## WHAT IT DELIVERS

- Integrated administrative, editing, and reviewing capabilities
- Thousands of configurable system options
- Flexible and automated email reminders
- Intuitive interface with step-by-step prompts
- Comprehensive, book-specific workflows, task settings, templates and more
- Ability to manage large numbers of manuscripts, articles, or sections of articles via topic/chapter management
- Professional and authoritative customer support

## WHAT YOU CAN DO

- Produce multi-author, multi-topic books with an end-to-end solution
- Manage a worldwide network of contributing authors in a single, centralized system
- Easily locate content for instantaneous “views” at any point in the publishing workflow
- Streamline author and editor communications across one system
- Easily configure workflow to meet highly specific requirements
- Gain better control overall of a complex, multi-faceted book publishing process

The first use of the industry leading ScholarOne platform for books management, ScholarOne Books manages the book publishing process from acquisition and content approval through content review, assembly, and release to production. This highly coordinated, streamlined approach lets each member of the team see those parts of the workflow and content relative to their responsibilities as well as what they need to accomplish in order to meet the publication date. Client-specific workflows and configurable options promote standardization and ease scheduling, tracking, and control of a complex and multi-faceted process.

## INTUITIVE INTERFACE

ScholarOne Books is the most configurable and comprehensive system available. The easy-to-use graphical user interface quickly guides even inexperienced users through editorial activities with step-by-step prompts; and the hands-on implementation and educational services allow editorial and production offices to focus on manuscripts, not system configuration and administration.

## STREAMLINE SUBMISSIONS

A team approach brings together every participant – acquisition editors, developmental editors, managing editors, contributors, and reviewers – into one centralized system. This transparent and coordinated structure makes it easy to see where each element of a book is at any given point, and helps assure that everything is progressing smoothly toward the final publication date.

Specific tools to help standardize and control the book publishing process:

- Multiple books may be hosted on a single ScholarOne Books site.
- Top line visibility for all content, combined with “drill-down” tools allow you to see the big picture, and then find the content that needs attention.

THOMSON REUTERS™

- Accepted content types, and content associated metadata sets are completely customizable.
- “Topic” hierarchy can be configured to mirror any book structure, for example; “Chapter”, “Subject”, “Section” etc.
- Editable page-specific instructions

#### REPORT ON THE PROCESS

- Build completely customized reporting dashboards for your project and schedule.
- Schedule any report for periodic email delivery.
- Use conditional formatting in your reports to highlight content that needs attention.

#### INTEGRATE WITH PRODUCTION

Use our native ScholarOne Document Type Definition (DTD) output XML, or have us match your production DTD.

#### INDUSTRY-LEADING SUPPORT

Your professional and authoritative user support team includes instruction writers, call center professionals, trainers, and file conversion technicians. You will have access to a Client Manager and Implementation Manager, as well as site-specific, instructor-led training. And you'll receive a rich set of educational tools, including the online ScholarOne Support, which offers online training, documentation, release notes, author and reviewer notes, and more.

The Topic Tree mirrors your publication structure

#### SCHOLARONE®

ScholarOne, a Thomson Reuters Business provides comprehensive workflow management systems for scholarly journals, books, and conferences. Its Web-based applications enable publishers to manage the submission, peer review, production, and publication processes more efficiently, increasing their profile among authors, decreasing time-to-market for critical scientific data, and lowering infrastructure costs. ScholarOne offers workflow solutions for the submission and review of manuscripts, abstracts, proceedings, books, grants & awards and production. Supporting over 365 societies and publishers, over 3400 books and journals, and 13 million users, ScholarOne is the industry leader.
