

PROTECT YOUR JOURNAL'S INTEGRITY

WITH SCHOLARONE MANUSCRIPTS™ PLAGIARISM CHECKING

WHAT IT DELIVERS:

- Seamless integration between ScholarOne Manuscripts, and CrossCheck and iThenticate
- Easy reporting on comparison results through a "Similarity Index"
- Comprehensive similarity analysis for submitted manuscripts

WHAT YOU CAN DO:

- Get rapid cross-reference and originality reporting on manuscript submissions
- Choose any role to submit a manuscript to iThenticate, at whatever point in the review process you decide
- Have notification emails automatically generated based on a similarity index percentage threshold

Plagiarism is a very real problem in the scholarly research community. If you publish plagiarized content, you not only commit an injustice against the original researchers, but you can severely damage your reputation and be subject to legal ramifications. Now, with the click of a button, you can upload a submission for comparison with content from more than 21,000 journals to ensure articles you publish are original work. ScholarOne's plagiarism checking feature makes it easy to protect your journal from publishing plagiarized content.

SEAMLESS LINKING FROM YOUR SCHOLARONE MANUSCRIPTS SITE

ScholarOne's plagiarism protection service lets you quickly and easily submit a manuscript to iThenticate directly from your current ScholarOne Manuscripts site. Customized to your workflow, you can set role-by-role submission rights and access the iThenticate link anywhere in the review process. You can also pre-define similarity index thresholds, automatically triggering an email when this meets or exceeds your set value. This notification can be configured to be delivered to anyone and can be turned on and off based on your journal's needs.

DETAILED SIMILARITY REPORTING DELIVERED FAST

CrossRef is an industry-leading non-profit association providing comparison services to help journals ensure only original content is published. When your manuscript is uploaded to their CrossCheck database for verification, it is compared to all other articles in their database using iThenticate technology.

Send automatic e-mail when overall Similarity Index Percentage is % or above

Save

Access your iThenticate account, set role and configuration options, and trigger automatic email based on Similarity Index Percentage within the ScholarOne system.

In less than a minute, you get a full report of the manuscript's similarity to all others in their system. This Overall Similarity Index Percentage lets you quickly and easily see how unique the content of the submission is. You can make decisions based on this score or drill down further to see the exact phrases and language matches, allowing you to determine if similarities are because of commonly used phrases within the field or if the author likely borrowed another author's work.

THOMSON REUTERS™

FULL TRACKING AND AUTOMATIC NOTIFICATIONS OF RESULTS

You can automatically share iThenticate's results with anyone in your workflow. By setting percentage- match thresholds, an email notification will be automatically generated and sent to your defined users any time a match greater than your limit is returned. The full report from iThenticate is also automatically linked to the manuscript in your system. This means that at any point editors, administrators, and reviewers can review the results of a submission's originality comparison and a record is permanently stored in the manuscript record.
